# Experience

---

**Digi-Chum Infotech ( oct/2023 - present )**

Frontend Developer ( 3 month )

## Key Responsibilities and Achievements:

- Developed and contributed to large-scale Angular projects, demonstrating strong programming and problem-solving skills.
- Utilized Geographic Information Systems (GIS) to provide spatial data analysis and solutions, enhancing the company's capabilities in location-based services.
- Interacted with clients to gather project requirements, provide updates, and address any questions or concerns, ensuring client satisfaction.

## Skills Acquired:

- Proficient in Angular, contributing to the development of impressive, client-facing applications.
- Skilled in GIS, enabling the company to offer enhanced location-based services.
- Strong teamwork and collaboration skills, fostering productive relationships with colleagues and clients.

---

## Work History & Projects

### 1:) Weather-Application:

- Features user-friendly interface, secure authentication, and integration of Open Weather API.
- User-friendly, secure, and real-time data. Ensured accurate weather data with a real-world application.
- Link : <https://weather-project-6a997.web.app>

### 2) Todo-List App:

- Implemented real-time task synchronization and secure task storage using Firebase.
- Focused on user-friendly design with practical real-world application.
- Link : <https://to-do-app-d879d.web.app>

### 3) Recipe-Book App:

- Designed a secure and responsive recipe management app.
- Utilized Firebase for data storage and secure authentication.
- Link : <https://second-recipe-project-5dc0b.web.app>
